

STOVERDALE CEMETERY MAP

Although the diagram below may not look like a map, in fact, it is. As in most cemeteries, burials do not resemble a teacher's seating chart. Rows are not straight and stones in one row do not line up with the stones in another. In the diagram below and in the cemetery, numbering starts with the row farthest from the church. Each stone in the row is given a unique number. If multiple names are carved on that stone then all of those names will have the same number. The Find function of the browser will allow the user to locate multiple occurrences of a given surname.
